

# Create A Balanced Eco-System

Ponds are a relaxing and beautiful addition to any landscape ... if they are properly maintained. Without adequate care they become unsightly to the landscape. EasyPro's line of water treatments are designed to make the care of your pond easy, effective and enjoyable. By eliminating the guess work and using simple dosages, EasyPro water treatments will keep your pond looking its best and provide a great home for fish and plants. Clear water, healthy fish and vibrant plants are the elements of any enjoyable pond.

Inside you will find helpful charts to identify your need, choose the product and determine when to apply. Simply find the condition of your pond and match the product recommended with the condition.

EasyPro's water treatments and quality fish foods will help you spend less time maintaining your pond and more time enjoying it!

## Aeration Systems

*EasyPro aeration systems provide year-round benefits for only pennies a day*

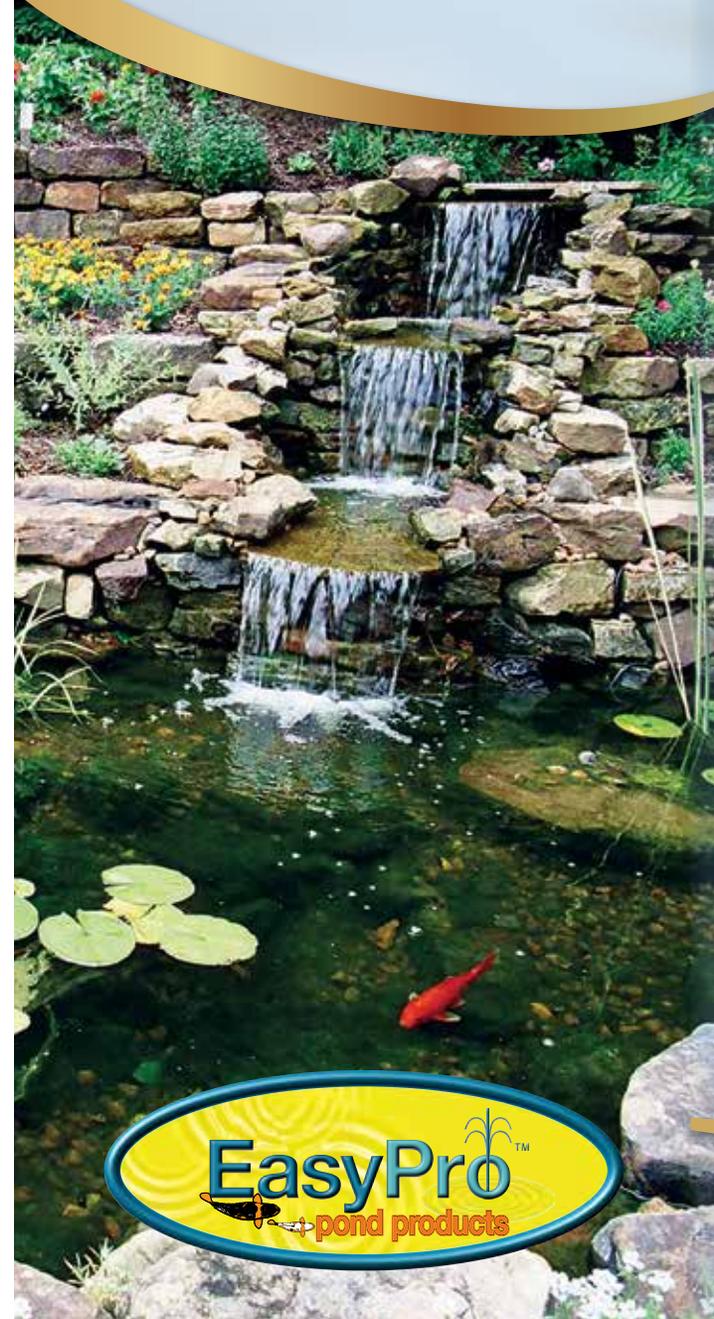

- Energy efficient way to aerate, destratify and circulate water in water gardens and koi ponds

- Ensure adequate oxygen levels during hot Summer days
- Maintains open water during Winter eliminating a freezing kill
- Increased oxygen levels, which will help with decomposing organic material, result in a cleaner and healthier pond
- Reliable — Compressors have few moving parts making them less likely to need repair
- Easy to install — compressors sit on shore connected by tubing to bottom mounted air diffusers

# WATER TREATMENTS

*Easy to understand and use!*

Match your pond's need with the EasyPro product below. With easy to understand application instructions you'll spend less time maintaining your pond and more time enjoying it!

Always read the product label for more detailed instructions prior to use.

Condition/Need	Treatment	Dosage	When to Apply
Cleaning rocks & statuary	<b>Rock &amp; Waterfall Cleaner</b> – Quickly and effectively cleans rocks, waterfalls, pondless features, fountains, statuary, plant pots, etc. Powerful oxygen based cleaning great for aquatic life.	One pound per 300 - 400 square feet	As needed
Remove odor & increase water clarity	<b>All Season Liquid Pond Bacteria</b> – Works in a wide range of temperatures. Removes ammonia, nitrites, nitrates, phosphates and sludge. Effective results without the smell.	Two fluid ounces per 1000 gallons of pond water	Weekly in Spring/Summer
Removing sludge & odor buildup	<b>Sludge Remover Bacteria</b> – Removes sludge and odors with convenient premeasured one ounce water soluble packets. Strongly recommended for ponds with gravel bottom.	One packet per 1,000 gallons of pond water	Weekly in Spring/Fall Summer as needed
Maintaining clear water naturally	<b>Liquid Barley Straw Extract</b> – All natural liquid formula releases humic acids. Works faster and is easier to use than barley bales or messy pellets.	Two fluid ounces per 1000 gallons of pond water	Every 2 - 3 weeks Spring/Summer
Making tap water safe for aquatic life	<b>Water Conditioner</b> – Tap water can harm aquatic life. Use EasyPro Water Conditioner to safely neutralize chlorine and destroy chloramines, it also binds and detoxifies heavy metals.	One fluid ounce per 1000 gallons of pond water	Whenever water is added to pond
Clearing cloudy water	<b>Water Clarifier</b> – Clears murky water fast by attracting suspended particles together allowing them to settle out of the water column.	One fluid ounce per 1000 gallons of pond water	As needed
Gives pond water a pleasing natural blue appearance	<b>Pond Dye</b> – Will not stain once dispersed in water. Concentrated formula.	One fluid ounce per 1000 gallons of pond water	As desired
Safely adjust pH levels up or down	<b>pH Up &amp; pH Down</b> – pH levels can change throughout the day, monitor these natural swings before attempting to raise or lower your pond's pH levels.	One fluid ounce per 600 gallons of pond water	As needed
Remove foam bubbles from water's surface	<b>Defoamer</b> – Highly concentrated food grade formula. Eliminates foam created by waterfalls.	One fluid ounce per 1000 gallons of pond water	As needed

Determine your pond's volume: length \_\_\_ft. x width \_\_\_ft. x average depth \_\_\_ft. x 7.48 = \_\_\_\_\_ gallons

# EasyPro Platinum Koi & Goldfish Food

*Floating pellets with an immune system booster – developed for your fish!*

EasyPro has combined the latest in ingredients and technology to give you a superior fish diet. Developed through decades of research, these diets are fed by leading breeders and producers with consistently great results! All the new EasyPro foods share these major benefits:

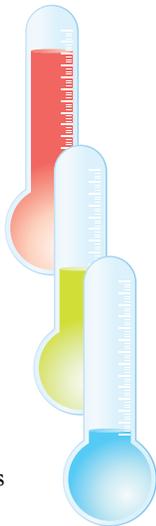

- Contains stabilized vitamin C and brewers yeast to promote fish development
- Formulated for easy digestibility minimizing waste from fish
- Contains all natural nutritional supplement designed to improve disease resistance
- Nitrogen preserved to increase freshness and shelf life - up to two years!

## ***When to feed your fish...***

Fish should be fed one to three times a day and only as much as they can consume in five minutes.

## ***Water temperature...***

Use Max Color or Max Growth and Color when water temperatures are over 50°F (10°C). When water temperatures drop below 50°F use Cold Water Food, stop feeding all together when water temperatures fall below 39°F (4°C). Resume feeding when water temperatures rise again to 39°F and above.

## ***What to use...***

Easy-to-read pond thermometers will help you in determining the best choices for feeding and chemical applications.

## **MAX GROWTH & COLOR**
